B.Tech, Computer Science and Engineering
Address : Dr. Nest PG, Eswaran Nagar, 1st Street, Ramapuram, Chennai

Summary

I am a Computer Science Engineering student at SRM Institute ofScience and Technology. I am passionate about softwaredevelopment and emerging technologies, with a focus ondelivering impactful, scalable solutions. My goal is to apply mytechnical expertise to drive innovation and contribute toadvancements into fields like artificial intelligence and softwareengineering.

Education

SRM IST-Ramapuram 2027
B.Tech · Computer Science and Engineering CGPA - 9.79/10

The Indian School, Bahrain 2023
Class XII - CBSE · pcmb · Bahrain Percentage - 87%

The Indian School, Bahrain 2021
Class X - CBSE · Bahrain Percentage - 93.8%

Experience

Supraja Technologies May 2025 - Jun 2025
Intern

I completed a Cybersecurity Internship where I was involved in conducting structured vulnerability assessments and preparing detailed technical documentation. My responsibilities included performing No Rate Limiting Vulnerability Testing on OTP-based authentication systems, analyzing potential risks through Parameter Tampering evaluations, and exploring Authentication Bypass Exploitation techniques. In addition, I developed a comprehensive SQL Injection Detection Report that documented procedures, flowcharts, and findings in a professional format. This experience provided me with strong exposure to web application security, vulnerability analysis, and technical reporting, while strengthening my problem-solving and analytical abilities in a professional environment.

Projects

Hostel Management System
Academic Project · Java, JDBC, MySQL Software Development (Java Application)

Developed a comprehensive Hostel Management System using Java to support hostel administration in managing student registrations, room allocations, fee payments, and occupancy tracking. The system featured dynamic room assignment, payment monitoring, and centralized student data management. This project enhanced my understanding of Object-Oriented Programming concepts, database integration using JDBC, and designing user-friendly interfaces, while providing practical exposure to building end-to-end management solutions.

Pacman Game
Independent Project · Python, Pygame Game Development

Created a Pacman-inspired interactive gaming application using Python and the Pygame library. The project included multiple mini-games with increasing levels of difficulty and player challenges, offering an engaging gameplay experience. This project strengthened my skills in Python programming, game logic design, event handling, and graphical interface development, while fostering creativity and problem-solving in game development.

Music Recommendation System

Academic Project · Python, Streamlit, Flask, SQLite, Pandas, NLP (TF-IDF) Machine Learning & Web Application Development

Designed and deployed a content-based Music Recommendation System that leverages Natural Language Processing (NLP) and TF-IDF techniques to analyze song lyrics and recommend music. Developed an interactive Streamlit application for user song suggestions, integrated with a Flask + SQLite login system for secure authentication. Processed large-scale datasets (e.g., spotify_millsongdata.csv) using Pandas to improve accuracy and user experience. This project enhanced my expertise in data preprocessing, pipeline optimization, and web-based deployment of machine learning models.

SQL Injection Detection

Internship Project · SQL, Web Security Testing Tools, ReportLab (Documentation) Cybersecurity & Vulnerability Assessment

As part of my Cybersecurity Internship, I developed a SQL Injection Detection Project Report that outlined structured procedures for identifying and analyzing SQL injection vulnerabilities in web applications. The project involved creating a professional technical document that included methodology, flowcharts, diagrams, and findings from simulated vulnerability assessments. Through this project, I gained hands-on exposure to web application security, vulnerability testing methodologies, and professional security documentation practices, while strengthening my technical writing and analytical skills in a professional setting.

Skills

Programming Languages: Python, JAVA, C++

Technical Skills: DSA

Languages and Frameworks: MySQL

: Communication, Adaptability, Leadership and Organization

Languages

English [Professional Working Proficiency], Malayalam [Native Proficiency], Hindi [Limited Working Proficiency], Tamil [Elementary Proficiency], French [Fundamental Proficiency]
